BERIL BEREKHYA MUTIA HASIBUAN

+6282391430073 | berilberekhya@gmail.com | https://www.linkedin.com/in/beril-berekhya/

Fullstack AI Engineer with hands-on experience shipping production AI/LLM systems, from workflow automation and AI-powered onboarding platforms to KPI scoring engines, that solve real operational problems at scale. Summa Cum Laude graduate in Informatics (GPA 3.92, ITENAS), completed in an accelerated 3 years and 4 months, with a strong track record in national tech competitions and deep learning research

Pengalaman Kerja

PT GITS Indonesia (HITOPIA Business Unit) - **Summarecon, Bandung City, West Java** Apr 2026 - Sep 2026

Fullstack AI Engineer Freelance

PT GITS Indonesia is a Bandung-based IT solutions and AI agency; HITOPIA, its talent outsourcing business unit, also builds internal AI tools for recruitment and operations.

- Built an innovative AI-powered CV masking web app that has processed 150+ CVs to date, replacing the manual masking process and freeing the sourcing team to focus on other job openings, cutting workload by 90%
- Built and shipped an AI-powered PDF export feature for an enterprise timesheet platform using the Anthropic Claude API and other LLM APIs to auto-generate Bahasa Indonesia narrative summaries from raw time-tracking data, a production integration, not a prototype
- Developed an overtime analysis and validation system via SPL (Surat Perintah Lembur), combining internal time-entry data (Clockify) with an external Indonesia public holiday API to automate compliance calculations, with workflow automation via n8n integrated into the backend
- Built dashboard features in Next.js for a client-facing productivity monitoring platform, including paginated data views, aggregation logic, and a data-integrity fix for duplicate employee records
- Automated offering letter generation for a major FMCG client, streamlining a process that was previously done manually
- Initiated development of an AI Interviewer system to support the recruitment process
- Built a Talent Performance Monitoring platform for an enterprise client, automating KPI scoring by combining Jira ticket-analytics (stage progression, cycle time, bug/completion/rejection rate) with configurable-weighted 360-degree review inputs to surface real-time Healthy / Needs Review / Low status per talent

PT. Ekosistem Geospasial Mandiri - **MT. Haryono Square Unit 0310, East Jakarta** Sep 2024 - Jan 2025

AI API Engineer Intern

PT. Ekosistem Geospasial Mandiri is a company specializing in geospatial data solutions, geographic information systems (GIS), and intelligent mapping ecosystems.

- Developed a robust computer vision model utilizing the YOLO architecture for automated and accurate palm tree counting from geospatial imagery.
- Managed end-to-end data processing pipelines, including comprehensive dataset labeling, cleaning, and preparation to ensure high model accuracy.
- Built and optimized AI integrations as an API Engineer, facilitating seamless deployment of machine learning models into the company's core services.

Institut Teknologi Nasional - **Bandung City, West Java** Sep 2024 - Jun 2025

Teaching and Laboratory Assistant

- Assisted in Basic Programming, Database Programming, and Computer Vision courses, mentoring students in Python fundamentals, SQL/relational database design, and computer vision/image processing concepts
- Facilitated hands-on lab sessions, evaluated assignments, and provided technical feedback to help students build proficiency in core and advanced Computer Science topics

Jenjang Pendidikan

Institut Teknologi Nasional - **Bandung City, West Java** Oct 2022 - Feb 2026

Bachelor of Computer Science (Informatics), 3.92/4.00

- Historical Summa Cum Laude Graduate. Achieved the unprecedented distinction of being the first student to graduate with Summa Cum Laude honors from the Informatics department, completing the program in an accelerated 3 years and 4 months.

Pengalaman organisasi

Persekutuan Pemuda Pemudi Methodist Indonesia (P3MI) – District III - **Bandung City, West Java** Jun 2024 - Jun 2026

West Java Regional Coordinator

A regional youth fellowship organization focusing on leadership development and collaborative community programs.

- Regional Leadership. Directed youth development programs across the West Java region to foster a highly collaborative organizational culture.
- Communication Management. Managed seamless communication and coordination between local chapters and the regional board.
- Event and Conflict Management. Facilitated large-scale regional events and effectively resolved organizational conflicts to maintain synergy.

Persekutuan Pemuda Pemudi Methodist Indonesia (P3MI) - Bandung Timur - **Bandung City, West Java** Oct 2023 - Oct 2025

Local Chairman

A local youth chapter dedicated to executing community programs and building strong youth relationships.

- Team Leadership. Led the local youth chapter by guiding committee members and planning various youth development programs.
- Community Building. Built strong, sustainable relationships within the local church community.
- Engagement Growth. Fostered a supportive organizational environment that successfully increased active member participation.

Himpunan Mahasiswa Informatika ITENAS - **Bandung City, West Java** Aug 2023 - Aug 2024

Technology Development Staff

The official student association for the Informatics department at Institut Teknologi Nasional Bandung.

- Website Maintenance. Managed and optimized the official student association website, applying web development practices to ensure smooth functionality, security, and an engaging user experience.
- Peer Mentoring. Facilitated academic tutoring sessions to help fellow students prepare for university exams.
- Content Creation. Developed structured and easy-to-understand learning materials for complex informatics coursework.
- Database Management. Managed the association database to ensure all academic resources were well-organized and highly accessible for members.

Christian Student Fellowship (Persekutuan Mahasiswa Kristen) - ITENAS - **Bandung City, West Java** Nov 2023 - Nov 2024

Spiritual Affairs Coordinator

A campus-based fellowship supporting the spiritual growth and community building of students at ITENAS.

- Program Direction. Directed spiritual programs and religious activities by organizing regular services and campus events.
- Community Engagement. Fostered a supportive community environment to encourage spiritual growth among students.
- Member Participation. Executed engaging initiatives that successfully increased active participation within the fellowship.

Keterampilan, Prestasi & pengalaman lain

- **Achievements** : 2nd Place National Winner at the Huawei ICT Competition CloudAI Track. Demonstrated advanced proficiency in artificial intelligence and cloud computing on a national level by securing the second position among top universities in 2024.
- **Achievements** : Bronze Medalist, Cipta Nusantara Fest, National Technology Essay and Business Plan Competition. Recognized for developing a well-argued written analysis on a technology-related issue/solution essay, competing against participants from universities nationwide.
- **Research** (2025): Lead author on two manuscripts: "Logit-based Knowledge Distillation for Video Violence Detection," an undergraduate thesis paper submitted to the International Journal of New Media Technology (IJNMT), 2025, and a paper on website digitalization for improved information access, submitted to Darma Abdi Karya journal, December 2025.
- **Projects** (2025): Community Service Student Creativity Program. Developed a prototype information website for GMI Bahtera Bandung Timur to digitalize service schedules and community news, effectively improving communication efficiency for the local organization.
- **Projects** (2026): Logit-based Knowledge Distillation for Video Violence Detection. Developed an advanced computer vision model utilizing X3D architecture for an undergraduate thesis to accurately detect violent activities in video streams, showcasing strong analytical and machine learning capabilities.
- **Projects** (2024): Automated Palm Tree Counting from Geospatial Imagery. Engineered a robust YOLO-based computer vision model during an internship at PT Ekosistem Geospasial Mandiri to identify and count palm trees from satellite imagery, optimizing the data processing pipeline.
- **Hard Skills**: Python, JavaScript, Next.js, SQL, Artificial Intelligence, MLOps, Machine Learning, Deep Learning, Computer Vision, YOLO, Knowledge Distillation, LLM Integration (Anthropic Claude API and other LLM APIs), API Development, n8n (Workflow Automation), Supabase, Git/GitHub, Vercel, Tailwind CSS.
- **Soft Skills**: Leadership, Analytical Thinking, Strategic Problem Solving, Time Management, Cross-functional Collaboration, Adaptability, Public Speaking.
- **Languages**: Indonesian (Native), English (Professional Working Proficiency).
